- Providing a basis for valuation and payments during construction
- Managing project costs and controlling budgets
- Supporting contractual obligations and variations management

NRM 2 and Its Role in Preparing a Bill of Quantities

The New Rules of Measurement (NRM 2) is a standard methodology published by the Royal Institution of Chartered Surveyors (RICS). It provides a structured approach for measuring and describing building works for the purpose of preparing Bills of Quantities. NRM 2 emphasizes clarity, consistency, and completeness, ensuring that all parties interpret the quantities uniformly.

Key Components of a NRM 2-Based Bill of Quantities

1. Preliminaries

These are general items that cover site setup, safety, temporary facilities, and other overhead costs necessary for the project's execution.

2. Work Sections

The main body of the BQ divided into various sections based on the nature of work:

- Site Preparation
- Foundations
- Superstructure
- Roofing
- Finishes
- Services (electrical, plumbing, HVAC)
- External Works

3. Quantities and Descriptions

Each item includes detailed descriptions aligned with NRM 2 standards, ensuring clarity and reducing ambiguities.

4. Rates and Prices

Unit rates are derived from current market prices, including labor, materials, and overheads, used for cost estimation and valuation.

5. Total Cost

The aggregate of all individual items provides the project's estimated total cost.

Example of a Bill of Quantities Based on NRM 2

To illustrate, here is a simplified example focusing on a foundational section of a residential building project.

Item 1: Site Clearing

- **Description:** Clearing and removing vegetation, debris, and topsoil from the site.
