Sample Economics Solved Questions and Answers

Question 1: Define the Law of Demand. Explain its exceptions.

Answer: The Law of Demand states that, *ceteris paribus* (all other factors being constant), there is an inverse relationship between the price of a good and the quantity demanded. In simple terms, as the price of a good increases, demand decreases, and vice versa.

Exceptions include:

- **Giffen Goods:** Inferior goods for which demand increases as the price rises, due to income effects.
- **Veblen Goods:** Luxury goods where higher prices increase desirability.
- **Necessities:** Goods with inelastic demand, where demand remains unaffected by price changes.

Question 2: Explain the concept of Price Elasticity of Demand with its types.

Answer: Price Elasticity of Demand measures how much the quantity demanded of a good responds to a change in its price. It is calculated as:

$$\text{Elasticity} = (\% \text{ Change in Quantity Demanded}) / (\% \text{ Change in Price})$$

Types of Price Elasticity of Demand:

- **Elastic Demand (Elasticity > 1):** Quantity demanded changes proportionally more than the price.
- **Inelastic Demand (Elasticity < 1):** Quantity demanded changes less than the price change.
- **Unitary Elasticity (Elasticity $= 1$):** Quantity demanded changes proportionally with price.
- **Perfectly Elastic Demand:** Infinite responsiveness at a specific price.
- **Perfectly Inelastic Demand:** No change in demand regardless of price changes.

Among the myriad of preparation strategies, the availability and utilization of sloved general knowledge CSS materials have gained prominence. These resources, often comprising solved question papers, comprehensive notes, and practice tests, serve as crucial tools for aspirants aiming to excel in the general knowledge (GK) component of the CSS exam. This article aims to dissect the significance, structure, benefits, and limitations of these sloved materials, providing a detailed, analytical perspective for both students and educators.

Understanding the Concept of Sloved General Knowledge CSS

Definition and Purpose

Sloved general knowledge CSS refers to collections or compilations of previously asked questions in CSS examinations, along with their correct answers and detailed explanations. - Accurate knowledge of recurring question patterns
- Familiarity with the scope and depth of questions
- Practice opportunities to improve speed and accuracy
- Insights into various topics within the GK syllabus

Why Are Sloved Resources Popular?

The popularity of sloved GK materials stems from their practical utility. They help aspirants avoid the pitfalls of unstructured studying and enable focused revision. Moreover, these materials often reflect the latest exam trends, making them invaluable for current preparation.

The questions in these materials are diverse, including:

- Short-answer questions
- Fill-in-the-blanks
- True/False statements

Most popular sloved compilations focus on MCQs, given their prevalence in the CSS GK paper.

Benefits of Using Sloved General Knowledge CSS Materials

1. Accelerated Preparation and Practice

By studying solved papers, aspirants can quickly familiarize themselves with common question formats and frequently asked topics. This accelerates the learning process and boosts confidence.

2. Improved Exam Strategy

Analyzing solved questions helps students identify patterns, such as the concentration of questions on certain topics, enabling them to allocate study time effectively.

3. Enhanced Understanding and Retention

Limitations and Critical Analysis of Solved Resources

While these materials are invaluable, they are not without limitations:

1. Risk of Over-Reliance

Dependence solely on solved papers can lead to rote memorization, undermining the development of analytical skills and comprehensive understanding.

2. Outdated Content Risks

Some compiled resources may contain outdated questions or answers, especially if not regularly updated, leading to potential inaccuracies.

3. Lack of Broader Context

Focusing heavily on question-answer formats might neglect the importance of understanding broader themes, socio-economic contexts, or current affairs that require critical thinking.

1. Complement with Comprehensive Study

Use sloved materials as a supplement to textbooks, current affairs updates, and scholarly articles rather than as the sole source.

2. Focus on Understanding, Not Memorization

After reviewing answers, spend time understanding the concepts and contexts, enabling better application in exam scenarios.

3. Regular Updates and Cross-Verification

Ensure that the practice materials are recent and cross-verify answers from authoritative sources to avoid misconceptions.

- B) As the price of a good decreases, demand decreases.
- C) There is an inverse relationship between price and demand, ceteris paribus.
- D) Demand is unaffected by changes in price.

Correct Answer: C

Explanation:

The Law of Demand states that, ceteris paribus, there is an inverse relationship between the price of a good and the quantity demanded. Curated Examples of Solved MCQs in Economics

Below are several representative solved MCQs, each accompanied by detailed reasoning and insights.

Example 1: Demand and Elasticity

Question:

If the price elasticity of demand for a good is 0.5, what will be the percentage change in quantity demanded if the price decreases by 10%?

A) 5% increase

B) 2% increase

C) 20% increase

D) 50% increase

Correct Answer: B

Solution and Explanation:

Price elasticity of demand (PED) is calculated as:

$$PED = \frac{\% \text{Change in Quantity Demanded}}{\% \text{Change in Price}}$$

Given:

$$PED = 0.5$$

$$\% \text{Change in Price} = -10\% \text{ (decrease, hence negative)}$$

Rearranging to find the percentage change in quantity demanded:

$$\% \text{Change in Quantity Demanded} = PED \times \% \text{Change in Price}$$

$$= 0.5 \times (-10) = -5\%$$

Since demand increases when prices decrease, the magnitude is positive:

Answer: 5% increase

But note that the question asks for the percentage change in quantity demanded when price decreases by 10%. Because the demand is inelastic (PED

Correct choice: B) 2% increase is not correct; the actual calculation yields 5%. But since B says 2%, we need to re-express. Let's check options.

Actually, the calculation shows 5%. Therefore, the correct answer should be A) 5% increase.

Correction: The initial options had a mistake. The correct answer is:

Answer: A) 5% increase

Key insight: The importance of understanding the sign conventions and the actual calculation process.

Example 2: Market Equilibrium

Question:

In a perfectly competitive market, if demand increases while supply remains unchanged, what is likely to happen?

- A) Price falls, quantity decreases
- B) Price rises, quantity remains unchanged
- C) Price rises, quantity increases
- D) Price remains unchanged, quantity increases

Correct Answer: C

Explanation:

An increase in demand shifts the demand curve outward/rightward. With supply unchanged, this leads to:

- Higher equilibrium price (due to increased competition among buyers)
- Higher equilibrium quantity (more goods are demanded at the new higher price)

Thus, the market moves to a new equilibrium with both price and quantity higher.

Answer: C) Price rises, quantity increases

Educational takeaway: Recognizing demand-supply shifts helps anticipate outcomes in market equilibrium.

Example 3: Fiscal Policy Impact

Question:

An increase in government expenditure, assuming other factors constant, will most likely

result in:

- A) Decreased aggregate demand
- B) Increased aggregate demand
- C) No change in aggregate demand
- D) Increased aggregate supply

Correct Answer: B

Explanation:

An increase in government expenditure is a component of aggregate demand (AD). When government spending increases:

- Aggregate demand shifts rightward
- This tends to increase overall output and prices in the short run

Therefore, the most probable outcome is an increase in aggregate demand.

Answer: B) Increased aggregate demand

Key learning point: Fiscal policy tools directly influence aggregate demand levels.
