While the visual impact is obvious, the building's internal infrastructure, particularly backstage areas, is equally impressive but often overlooked.

Structural Complexity and Spatial Design

The backstage facilities comprise several zones, each meticulously designed to support the needs of performers, crew, and technical staff:

- Dressing Rooms and Rehearsal Spaces: Over a dozen dressing rooms, some equipped with personal amenities, are distributed across multiple floors.
- Instrument Storage and Maintenance: Specialized areas for storing and maintaining a wide array of instruments, from grand pianos to orchestral percussion.
- Stage Access and Load-in Zones: Multiple loading docks and freight elevators facilitate quick and efficient set changes and equipment delivery.
- Technical Control Rooms: Located strategically to oversee acoustics, lighting, and sound engineering during performances.

The spatial layout is engineered for maximum efficiency, with corridors and lifts designed to minimize noise and vibration, protecting the acoustical integrity of the concert halls.

Utilities and Environmental Controls

Behind the scenes, a sophisticated network of HVAC systems, power supplies, and fire safety protocols operate continuously:

- Climate Control: Precise temperature and humidity regulation are vital for instrument preservation and performer comfort.
- Power Backup: Redundant power systems ensure uninterrupted operation during performances, especially for sensitive audio-visual equipment.
