Analyzing Key Questions from the 2014 Exemplar

Exam questions in the 2014 exemplar are designed to test both theoretical knowledge and practical application. Below are examples of typical question types and how to approach them.

Data Handling and Graphs

Sample Question:

A pie chart shows the distribution of students' preferred sports. If 30% prefer soccer, 25% prefer basketball, and the remaining prefer other sports, how many students preferred other sports if there are 200 students in total?

Approach:

- Calculate the percentage for other sports: $100\% - (30\% + 25\%) = 45\%$
- Find the number of students: $45\% \text{ of } 200 = 0.45 \times 200 = 90 \text{ students}$

Financial Calculations

Sample Question:

Calculate the total amount payable on a loan of R10,000 at an interest rate of 12% per annum simple interest over 3 years.

Approach:

- Use the simple interest formula:

$$\text{Interest} = \text{Principal} \times \text{Rate} \times \text{Time}$$

$$\text{Interest} = 10,000 \times 0.12 \times 3 = \text{R}3,600$$

- Total amount payable = Principal + Interest = R10,000 + R3,600 = R13,600

Measurement and Geometry

Sample Question:

Calculate the volume of a cylinder with a radius of 3 meters and height of 5 meters.

Approach:

- Use the volume formula for a cylinder: $V = \pi r^2 h$
- $V = 3.14 \times 3^2 \times 5 = 3.14 \times 9 \times 5 = 3.14 \times 45 \approx 141.3 \text{ m}^3$
