The Adventure of the Speckled Band

Context and Summary

Published in 1892 as part of *The Adventures of Sherlock Holmes*, "The Adventure of the Speckled Band" is often regarded as one of Doyle's most chilling and suspenseful stories. She claims that she has heard mysterious noises and fears she might suffer the same fate as her sister, Julia, who died two years earlier under strange circumstances.

The story is set in Holmes's Baker Street apartment, where Helen describes her fears. She reports that her stepfather, Dr. Grimesby Roylott, a violent and intimidating man, has a history of cruelty and has recently been behaving more aggressively. Helen explains that her sister Julia was mysteriously awakened early in the night before her death, crying out and then dying in her sleep. The only clue Holmes finds is a strange, speckled band of silk that Helen notices in her sister's belongings.

Holmes and his faithful friend, Dr. Watson, investigate Roylott's estate, uncovering a sinister secret involving a trained swamp adder (a venomous snake). Holmes deduces that Roylott had trained the snake to crawl through a ventilator and a fake bell-pull to attack Julia and Helen in their bedrooms. Using his deductive skills, Holmes devises a plan to trap the snake, saving Helen from a similar fate.

Holmes's curiosity leads him to investigate how the gem ended up in the goose. He uncovers a complex web of theft, deception, and societal class distinctions.

Holmes's investigation reveals that the gemstone was stolen by a criminal named John Horner, who used the goose to smuggle the jewel. However, Holmes's moral principles lead him to consider the broader context. Instead of punishing Horner, Holmes decides to show mercy, recognizing that Horner is a poor man trying to survive amid economic hardship.

Overview of the Test Structure

The Watson Glaser typically comprises five main sections:

- Inference
- Recognition of Assumptions
- Deduction
- Interpretation
- Evaluation of Arguments

Each section evaluates different facets of critical thinking, and understanding the structure helps candidates prepare effectively.

Sample Questions and Practice for Each Section

1. Inference

This section asks you to draw logical conclusions from a set of statements or data.

Sample Question:

All doctors are trained professionals. Some professionals are not doctors. Based on this, which of the following is true?

- a) All trained professionals are doctors.
- b) Some trained professionals are not doctors.
- c) No professionals are trained.
- d) All professionals are trained.

Answer and Explanation:

The correct answer is b). Since all doctors are trained professionals and some professionals are not doctors, it logically follows that some trained professionals might not be doctors.

Practice Tip:

Focus on carefully reading statements and avoid jumping to conclusions. Think about what the statements imply directly and what they do not imply.

2. Recognition of Assumptions

This section tests your ability to identify unstated assumptions underlying arguments.

Sample Question:

The city council has decided to increase funding for public transportation because traffic congestion has worsened over the past year.

Which of the following assumptions is necessary for the decision to increase funding?

- a) Traffic congestion is caused by insufficient public transportation.
- b) Public transportation is a popular mode of travel.
- c) The city council has sufficient funds to increase transportation budgets.
- d) The traffic congestion is a recent problem.

Answer and Explanation:

The correct answer is a). For the funding increase to address traffic congestion, it's assumed that congestion is related to inadequate public transportation.

Practice Tip:

Identify the conclusion or decision first, then determine what must be true for that decision to make sense.

3. Deduction

Deduction involves applying general rules to specific scenarios to reach logical conclusions.

Sample Question:

All vehicles with electric engines are environmentally friendly. Some vehicles with electric engines are bicycles.

Based on this, which of the following can be concluded?

- a) All electric vehicles are bicycles.
- b) Some environmentally friendly vehicles are bicycles.
- c) No electric vehicles are bicycles.
- d) All bicycles are environmentally friendly.

Answer and Explanation:

The correct answer is b). Since some electric vehicles are bicycles, and all electric vehicles are environmentally friendly, it follows that some environmentally friendly vehicles are bicycles.

Practice Tip:

Use diagrams if needed to visualize relationships and avoid making unwarranted assumptions.

4. Interpretation

This section asks you to interpret information or data and determine what it suggests.

Sample Question:

A survey found that 70% of respondents prefer online shopping over in-store shopping.

What can be inferred from this?

- a) In-store shopping is outdated.
- b) The majority of people prefer online shopping.
- c) Online shopping is cheaper than in-store shopping.
- d) All respondents prefer online shopping.

Answer and Explanation:

The correct answer is b). Since 70% prefer online shopping, it indicates that the majority do, but it does not specify reasons or exclude other preferences.

Practice Tip:

Focus on what the data directly shows, avoiding overgeneralizations.

5. Evaluation of Arguments

This section requires you to assess the strength or weakness of arguments presented.

Sample Question:

Argument: Increasing the minimum wage will reduce poverty because higher wages give workers more income.

Which of the following best describes this argument?

- a) It is a strong argument because higher wages always reduce poverty.
- b) It is a weak argument because it ignores potential negative effects on employment.
- c) It is an irrelevant argument because wages do not affect poverty.
- d) It is unimportant because poverty levels are unaffected by wages.

Answer and Explanation:

The correct answer is b). While higher wages can help reduce poverty, the argument ignores potential negative consequences like reduced employment opportunities, making it a somewhat weak argument.

Practice Tip:

Critically evaluate each argument's assumptions, evidence, and potential counterarguments.
